SUMMARY

Junior Frontend Developer with hands-on project experience building and deploying responsive web applications using **Next.js, React, TypeScript, and Tailwind CSS**. Built independent projects from concept to deployment, including e-commerce applications, a Filipino calculator platform, and a price comparison platform. Experienced with responsive UI, accessibility, SEO, testing, and practical frontend problem-solving. Seeking a remote/WFH frontend development opportunity where I can contribute and continue growing as a developer.

SELECTED PROJECTS

Emerald Garden — E-Commerce Storefront

Next.js 16, React 19, TypeScript · [live](#) · [code](#)

- Built a responsive storefront with browsing, cart, checkout, and order flows across **10 product pages and 7 API routes**.
- **Server-side price validation** and stock reservation prevent overselling; payments behind a provider interface (mock + Stripe) with **HMAC webhook verification**.
- **57 Playwright e2e + 28 unit tests**, including accessibility checks (focus order, contrast, skip link), enforced in CI.

ComputePH — Filipino Calculator Platform

Next.js, TypeScript, Vitest · [live](#) · [code](#)

- Built and deployed a Filipino calculator platform: **12 calculators** (SSS, PhilHealth, Pag-IBIG, income tax, 13th month, loans) as reusable TypeScript engines.
- **274 passing unit tests**; engines share validation logic; static SEO pages with JSON-LD, sitemap, and per-page metadata.

TagPricePH — Price Comparison Platform

Next.js, TypeScript, PostgreSQL, Tailwind · [live](#) · [code](#)

- Built a Filipino price comparison platform — comparison UI, typo-tolerant search, price-history charts, token-gated admin — **Neon PostgreSQL, 14 migrations**.
- Designed **provider, normalization, matching, and database layers**; Shopee, Lazada, and TikTok Shop adapters fail closed without authorized credentials.
- Implemented 8 API routes, redirect tracking with click attribution, and **20 automated verification suites** over schema, security, matching, and freshness.

HIRO — E-Bike Landing & Checkout

Next.js, TypeScript, Tailwind, Framer Motion · [live](#) · [code](#)

- Landing page with a **three-bike configurator**, slide-over cart (dialog semantics + focus trap), and a full checkout flow through order confirmation.
- **48 unit tests**; Playwright e2e on desktop and mobile; **axe-core accessibility checks enforced in GitHub Actions CI**; Lighthouse 95 mobile.

Redwood Retreats — Cabin Rental Site

Next.js, Canvas API, Tailwind · [live](#) · [code](#)

- Canvas animation paused off-screen via IntersectionObserver, hydration-safe particles, keyboard-navigable lightbox (Escape/arrows), accessible FAQ with **aria-expanded** + FAQ JSON-LD; **41 unit tests**.

Cosmic Ray Solar — Solar Installer Website

Next.js 16, Vitest, Playwright · [live](#) · [code](#)

- **19 page routes + 5 API routes** — shop, blog, case studies, six city pages for local SEO, persistent cart, quote estimator; **59 unit tests** in CI.

SKILLS

FRONTEND

React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

TESTING

Vitest, Playwright, Testing Library

WEB

Responsive Design, Accessibility, SEO, Web Performance

BACKEND / DATA

Next.js API Routes, PostgreSQL, REST APIs

TOOLS

Git, GitHub, GitHub Actions, Vercel, Netlify, Chrome DevTools, ESLint

EDUCATION

Senior High School Graduate

San Miguel, Bulacan, Philippines

LANGUAGES

Tagalog — Native
English — Intermediate
